

# MITIGATION MONITORING AND REPORTING PROGRAM

State Clearinghouse No: 2017031020

**PROJECT NAME:** Trails at Santiago Creek Specific Plan

**PROJECT LOCATION:** City of Orange

**PROJECT DESCRIPTION:** The Trails at Santiago Creek Specific Plan proposes the transformation of a rock and concrete materials recycling and backfilling operation to an environmentally enhanced, ecologically friendly open space environment embracing a well-planned and attractive single-family detached residential neighborhood. The project proposes the development of 128 dwellings on approximately 40.7 acres of the approximately 109.2-acre site, with varying lots sizes including lots larger than 8,000 square feet. The majority of the project site (62.7 percent) is intended for the enhancement and preservation of the natural greenway/open space and Santiago Creek environs, as well as re-establishing open grasslands in areas that have been denuded by the project site’s history of commercial operations, totaling approximately 68.5 acres. Recreational trails will provide public access to the enhanced revegetated interior of the site.

**LEAD AGENCY:** City of Orange

**CONTACT PERSON/ TELEPHONE NO.:** Robert Garcia, Senior Planner / 714.744.7231

**APPLICANT:** Milan Capital Management

**CONTACT PERSON/ TELEPHONE NO.:** Christopher Nichelson, President / 714.687.0000

**TIME FRAME:** Where the time frame required for compliance with a mitigation measure is prior to issuance of a particular permit, the responsible party for monitoring shall ensure compliance at any time prior to issuance of the permit. Where the time frame required for compliance with a mitigation measure is “during” a particular activity, such as construction, the party responsible for monitoring shall monitor periodically during that time frame.

				Initials	Date	Remarks
<b>Aesthetics</b>						
MM AES-3	Prior to issuance of building permits, the project applicant shall prepare and submit lighting plans to the City of Orange for review and approval. The plans shall demonstrate that all exterior lighting fixtures comply with Orange Municipal Code Chapter 17.12.030, which requires that new light fixtures be directed, controlled,	Prior to issuance of building permits; Applicant	Prior to issuance of building permits; City of Orange			

No.	Mitigation Measure	Time Frame and Responsible Party for Implementation	Time Frame and Responsible Party for Monitoring	Verification of Compliance		
				Initials	Date	Remarks
	screened or shaded in such a manner as not to shine directly on surrounding premises. Additionally, lighting on any residential property must be controlled so as to prevent glare or direct illumination of any public sidewalk or thoroughfares.					
<b>Agriculture and Forestry Resources</b>						
No mitigation is necessary.						
<b>Air Quality</b>						
<b>MM AIR-1a</b>	During construction, all equipment shall be maintained in good operating condition so as to reduce emissions. The construction contractor shall ensure that all construction equipment is properly serviced and maintained in accordance with the manufacturer's specifications. Maintenance records shall be available at the construction site for City verification.	During construction, including site preparation and grading activities; Applicant	During construction, including site preparation and grading activities; City of Orange			
<b>MM AIR-1b</b>	All paints and coatings shall meet or exceed performance standards noted in SCAQMD Rule 1113. To ensure compliance with SCAQMD Rule 1113, the following volatile organic compound (VOC) control measures shall be implemented during architectural coating activities: a) Use paints with a VOC content of no more than 50 grams per liter for both interior and exterior coatings. b) Keep lids closed on all paint containers when not in use to prevent VOC emissions and excessive odors.	During painting and coating activities; Applicant	During painting and coating activities; City of Orange			

No.	Mitigation Measure	Time Frame and Responsible Party for Implementation	Time Frame and Responsible Party for Monitoring	Verification of Compliance		
				Initials	Date	Remarks
	<p>c) Use compliant low VOC cleaning solvents to clean paint application equipment.</p> <p>d) Keep all paint and solvent laden rags in sealed containers to prevent VOC emissions.</p>					
<b>MM AIR-1c</b>	<p>Prior to the issuance of grading permits for the project, the project applicant shall include a dust control plan as part of the construction contract standard specifications. The dust control plan shall include measures to meet the requirements of SCAQMD Rules 402 and 403. Such basic measures may include but are not limited to the following:</p> <p>a) All haul trucks shall be covered prior to leaving the site to prevent dust from impacting the surrounding areas.</p> <p>b) Moisten soil each day prior to commencing grading to depth of soil cut.</p> <p>c) Water exposed surfaces at least three times a day under calm conditions, and as often as needed on windy days or during very dry weather in order to maintain a surface crust and minimize the release of visible emissions from the construction site.</p> <p>d) Treat any area that will be exposed for extended periods with a soil conditioner to stabilize soil or temporarily plant with vegetation.</p> <p>e) Use street sweepers that comply with SCAQMD Rules 1186 and 1186.1.</p>	Prior to issuance of grading permits; Applicant	Prior to issuance of grading permits; City of Orange			

No.	Mitigation Measure	Time Frame and Responsible Party for Implementation	Time Frame and Responsible Party for Monitoring	Verification of Compliance		
				Initials	Date	Remarks
	<p>f) All contractors shall turn off all construction equipment and delivery vehicles when not in use, or limit on-site idling to no more than 5 minutes in any one hour.</p> <p>g) On-site electrical hook ups to a power grid shall be provided for electric construction tools including saws, drills, and compressors, where feasible, to reduce the need for diesel powered electric generators.</p> <p>h) Traffic speeds on all unpaved roads to be reduced to 15 miles per hour or less.</p> <p>i) Sweep streets at the end of the day if visible soil is carried onto adjacent public paved roads.</p>					
<b>MM AIR-1d</b>	<p>Prior to and during grading activities, the project applicant shall comply with South Coast Air Quality Management District Rule 403 as follows:</p> <ul style="list-style-type: none"> <li>• The applicant shall submit a fully executed Large Operation Notification (Form 403 N) to the SCQAMD Executive Officer within 7 days of qualifying as a large operation. The form shall include the name(s), address(es), and phone number(s) of the person(s) responsible for the submittal, and a description of the operation(s), including a map depicting the location of the site.</li> <li>• Maintain daily records to document the specific dust control actions taken, maintain such records for a period of not less than</li> </ul>	Prior to and during grading activities; Applicant	Prior to and during grading activities; City of Orange

	<p>least 70 percent of the optimum soil moisture content. Two soil moisture evaluations must be conducted during the first three hours of active operations during a calendar day, and two such evaluations during each subsequent four-hour period of active operations.</p> <p><b>Earth Moving—Construction Cut Areas and Mining Operations</b>  1c. Conduct watering as necessary to prevent visible emissions from extending more than 100 feet beyond the active cut or mining area unless the area is inaccessible to watering vehicles due to slope conditions or other safety factors.</p> <p><b>Disturbed Surface Areas—Completed Grading Areas</b>  2a/b. Apply dust suppression in sufficient quantity and frequency to maintain a stabilized surface. Any areas which cannot be stabilized, as evidenced by wind driven fugitive dust must have an application of water at least twice per day to at least 80 percent of the unstabilized area.  2c. Apply chemical stabilizers within five working days of grading completion; OR  2d. Take actions (3a) or (3c) specified for inactive disturbed surface areas.</p>					

No.	Mitigation Measure	Time Frame and Responsible Party for Implementation	Time Frame and Responsible Party for Monitoring	Verification of Compliance		
				Initials	Date	Remarks
	<p><b>Inactive Disturbed Surface Areas</b>  3a. Apply water to at least 80 percent of all inactive disturbed surface areas on a daily basis when there is evidence of wind driven fugitive dust, excluding any areas which are inaccessible to watering vehicles due to excessive slope or other safety conditions; or  3b. Apply dust suppressants in sufficient quantity and frequency to maintain a stabilized surface; or  3c. Establish a vegetative ground cover within 21 days after active operations have ceased. Ground cover must be of sufficient density to expose less than 30 percent of unstabilized ground within 90 days of planting, and at all times thereafter; OR  3d. Utilize any combination of control actions (3a), (3b), and (3c) such that, in total, these actions apply to all inactive disturbed surface areas.</p> <p><b>Unpaved Roads</b>  4a. Water all roads used for any vehicular traffic at least once per every two hours of active operations [3 times per normal 8-hour work day]; or  4b. Water all roads used for any vehicular traffic once daily and restrict vehicle speeds to 15 miles per hour; or  4c. Apply a chemical stabilizer to all unpaved road surfaces in sufficient quantity</p>					

No.	Mitigation Measure	Time Frame and Responsible Party for Implementation	Time Frame and Responsible Party for Monitoring	Verification of Compliance		
				Initials	Date	Remarks
	<p>and frequency to maintain a stabilized surface.</p> <p><b>Open Storage Piles</b>            5a. Apply chemical stabilizers; or            5b. Apply water to at least 80 percent of the surface area of all open storage piles on a daily basis when there is evidence of wind driven fugitive dust; or            5c. Install temporary coverings; or            5d. Install a three-sided enclosure with walls with no more than 50 percent porosity which extend, at a minimum, to the top of the pile. This option may only be used at aggregate-related plants or at cement manufacturing facilities.</p> <p><b>All Categories</b>            6a. Any other control measures approved by the Executive Officer and the U.S. EPA as equivalent to the methods specified in this mitigation measure may be used.</p>					
<b>MM AIR-1f</b>	<p>Prior to and during grading activities, the project applicant shall implement the following contingency control measures for large operations, as applicable, pursuant to and when required by South Coast Air Quality Management District Rule 403:</p> <p><b>Earth Moving</b></p>	<p>Prior to and during grading activities;            Applicant</p>	<p>Prior to and during grading activities;            City of Orange</p>

	<p>via regulatory permits (such as a CWA Section 404 permit issued by the United States Army Corp of Engineers [USACE]), which will require that the U.S. Fish and Wildlife Service (USFWS) be consulted as provided for by Section 7 of the FESA (for the federally listed least Bell's vireo). The federal regulatory permits (such as CWA Section 404 permit issued by the USACE) provide a "federal nexus" by which Section 7 consultation can occur. This statute imposes the obligation on federal agencies to ensure that their actions (such as issuing federal CWA permits for this project) are not likely to jeopardize the continued existence of a listed species or destroy or adversely modify its designated critical habitat. This obligation is enforced through the procedural requirement that agencies such as the USACE initiate consultation with the USFWS on any actions that may affect a threatened or endangered species. During the FESA Section 7 consultation anticipated for this project, the USFWS will gather all relevant information concerning the proposed project and the potential project-related impacts on the least Bell's vireo (i.e., the project applicant will submit a species-specific Biological Assessment), prepare its opinion with respect to whether the project is likely to jeopardize the</p>	<p>habitat and during construction activities; Applicant</p>	<p>and during construction activities; City of Orange</p>			

No.	Mitigation Measure	Time Frame and Responsible Party for Implementation	Time Frame and Responsible Party for Monitoring	Verification of Compliance

				Initials	Date	Remarks
	<p>Orange General Plan Noise Element to ensure that noise levels to which the riparian area is exposed do not exceed noise standards for residential areas.</p> <p>7. The project shall be designed to minimize exterior night lighting while remaining compliant with City of Orange ordinances related to street lighting. Any necessary lighting (e.g., to light up equipment for security measures), both during construction and after the development has been completed, will be shielded or directed away from Santiago Creek and are not to exceed 0.5 foot-candles. Monitoring by a qualified lighting engineer (attained by the project applicant and subject to spot checking by City Staff) shall be conducted as needed to verify light levels are below 0.5 foot-candles required within identified, occupied least Bell's vireo territories, both during construction and at the onset of operations. If the 0.5 foot-candles requirement is exceeded, the lighting engineer shall make operational changes or install a barrier to alleviate light levels during the breeding season.</p> <p>8. Two brown-headed cowbird traps shall be installed and maintained within the general vicinity of the habitat for five years. If equestrian trails are proposed within the project site, which may result in increased</p>					

No.	Mitigation Measure	Time Frame and Responsible Party for Implementation	Time Frame and Responsible Party for Monitoring	Verification of Compliance		
				Initials	Date	Remarks
	horse manure and the potential for increased foraging resources for brown-headed cowbirds, an ongoing manure management receptacle/maintenance plan shall be prepared and implemented.					
<b>MM BIO-2b</b>	<p>The following shall be incorporated into the Biological Assessment as proposed mitigation for potential impacts to least Bell's vireo, subject to USFWS and CDFW approval:</p> <ol style="list-style-type: none"> <li>1. On- or off-site restoration or enhancement of least Bell's vireo habitat at a ratio no less than 3:1 for permanent grading impacts.</li> </ol>	During preparation of Biological Assessment in areas of least Bell's vireo habitat; Applicant	During review of Biological Assessment; City of Orange, USFWS and CFW.			
<b>MM BIO-2c</b>	All construction, grading, and fuel modification activities (i.e., thinning) shall take place outside of the least Bell's vireo breeding season (March 15 to September 15) to the greatest extent feasible. If any construction, grading, and fuel modification activities are required during the breeding season within 300 feet of potential least Bell's vireo habitat, and pre-construction surveys determine least Bell's vireo are present, activities may continue in the presence of a biological monitor who will confirm that no work will occur within a 300-foot buffer of least Bell's vireo, and that any least Bell's vireo are not being disturbed	During construction, grading or fuel modification activities if construction, grading or fuel modification activities are proposed in areas supporting least Bell's vireo habitat breeding season (March 15-September 15);	During construction, grading or fuel modification activities if construction, grading or fuel modification activities are proposed in areas supporting least Bell's vireo habitat breeding season (March 15-September 15); City			

No.	Mitigation Measure	Time Frame and Responsible Party for Implementation	Time Frame and Responsible Party for Monitoring	Verification of Compliance		
				Initials	Date	Remarks
	<p>by project activities. If any disturbance to the least Bell's vireo is detected by the biological monitor, the buffer will be increased, other disturbance minimizing measures may be implemented (e.g., visual and/or noise barrier), and/or work will cease as recommended by the monitor.</p> <p>Additional measures to be taken for all construction activities within 300 feet of potential least Bell's vireo habitat during the breeding season (March 15 to September 15):</p> <ol style="list-style-type: none"> <li>1. Pre-construction surveys shall be conducted within 1 week prior to initiation of construction activities and all results forwarded to the USFWS and CDFW. Focused surveys shall be conducted for least Bell's vireo during construction activities.</li> <li>2. If at any time least Bell's vireo are found to occur within 300 feet of construction areas, the monitoring biologist shall inform the appropriate construction supervisor to cease such work and shall consult with the USFWS and CDFW to determine if work shall commence or proceed during the breeding season and, if work may proceed, what specific measures shall be taken to ensure least Bell's vireos are not affected.</li> <li>3. Installation of any noise barriers and any other corrective actions taken to mitigate</li> </ol>	Applicant	of Orange and/or Qualified Biologist			

No.	Mitigation Measure	Time Frame and Responsible Party for Implementation	Time Frame and Responsible Party for Monitoring	Verification of Compliance		
				Initials	Date	Remarks
	noise during the construction period shall be communicated to the USFWS and CDFW.					
<b>MM BIO-2d</b>	<p>Prior to the issuance of any grading permit that would remove habitat containing raptor and songbird nests, the project applicant shall demonstrate to the satisfaction of the City that either of the following have been or will be accomplished.</p> <p>1. Vegetation removal activities shall be scheduled outside the nesting season (September 1 to February 14 for songbirds; September 1 to January 14 for raptors) to avoid potential impacts to nesting birds.</p> <p>2. Any construction activities that occur during the nesting season (February 15 to August 31 for songbirds; January 15 to August 31 for raptors) will require that all suitable habitat be thoroughly surveyed for the presence of nesting birds by a qualified biologist before commencement of clearing. If any active nests are detected, a buffer of at least 300 feet (500 feet for raptors) will be delineated, flagged, and avoided until the nesting cycle is complete, or as determined appropriate by the biological monitor, to minimize impacts.</p>	Prior to the issuance of any grading permit that would remove habitat containing raptor and songbird nests; Applicant	Prior to the issuance of any grading permit that would remove habitat containing raptor and songbird nests; City of Orange and/or Qualified Biologist			
<b>MM BIO-3</b>	Prior to the issuance of any grading permit in the areas designated as sensitive riparian communities (e.g., southern cottonwood-willow riparian forest or black	Prior to issuance of grading permit in areas designated as sensitive	Prior to issuance of grading permit in areas designated as sensitive riparian
