ROUGH GRADING STATEMENT

(1) By Geotechnical Engineer

I state that the rough grading work incorporates all recommendations contained in the report or reports for which I am responsible and all recommendations that I have made based on field inspection of the work and testing during grading. Where the reports of an Engineering Geologist, relative to this site, have recommended the installation of buttress fills or other similar stabilization measures, such earth work construction has been completed in accordance with the approved design. I further state that, upon completion of grading, there are no observed conditions that would adversely affect the proposed improvements and that the site is suitable for its intended use.

See _____ for test data, recommended allowable soil bearing values and other special recommendations.
